

Additional Addendums prior to Rental

****Additional requirements, responsibilities to be acknowledged by the Renter, Lessee and/or client. ****

****Each paragraph must be initialed before the RV can be leased/rented. ****

The Renter, Lessee or client is 100% responsible for any and all damages that occur while the Motor home or travel trailer is in her/his possession. If any component of the motor home or travel trailer becomes disabled it will be immediately assumed the renter is liable and responsible for any and all repairs associated. Only Rising Sun RV staff will determine if the failed component is NOT the fault of the renter, Lessee or client; however until this can be verified by a fully qualified Rising Sun RV staff member, master RV technician or certified ASE Auto motive mechanic then all damages and equipment failure will be charged to the renters security deposit.

Initials of the Renter, Lessee or client _____

Deposits will be automatically lifted from Renters, Lessee's or Client's bank or credit card company after 10 business days from the check in date. You agree that Rising Sun RV staff members have 10 days from the check in date to fully inspect the RV for additional damages, equipment malfunction or evidence of additional charges that may apply such as Pet Fee, Smoking or cleaning fees. The security/damage deposit is a hold placed on the Renter's, lessees, or Client's Credit card or bank card, these funds will not be available during the RV rental period. If charges are necessary then Rising Sun RV staff will use the security/damage deposit as the primary source of funds and we will charge the necessary fees from the security deposit. You are agreeing that charges will not be disputed with your credit card company and you understand your full responsibilities and liabilities of this RV, motor home or travel trailer rental. You the Renter, lessee or client are 100% responsible for the condition of the RV upon its return, the check in does not endorse the RV or travel trailer as being in good or original condition prior to its check out, it simply verifies odometer, generator hours, fuel levels and any obvious equipment damage or equipment failures. You agree to pay for the total cost of damage or equipment failures caused during your rental period as determined by Rising Sun RV, its affiliates and staff members. If the cost exceeds the security deposit you will be invoiced and required to pay the additional amount in full within 30 calendar days of the invoice date.

Late returns: a full day charge and a late fee will apply if the unit is not brought back on time, specified on the contract or discussed verbally with a Rising Sun RV staff member. If the unit is more than 30 minutes late from contract return time or the verbally agreed upon time then it will be considered late and a full day rental plus a \$75.00 late fee will also apply. All charges will be applied against the security deposit; there is no exception to this policy. Please plan accordingly, watch weather prior to departure. It is not the responsibility of Rising Sun RV to make these decisions for you nor to tolerate or accept late arrivals. If you are running late, and something has delayed your return then please call Rising Sun RV staff to inform us of this delay, however we will still be applying an additional daily charge. Knowledge

Tire Policy:

If a tire has failed and needs to be repaired, the renter/lessee or client is 100% responsible for fixing, repairing and replacing the failed tire at the renter/lessee or client's expense. If the renter/lessee or client buys the additional tire protection, all costs associated with the purchase of the tire will be fully refunded to the renter/lessee or client. Otherwise, tire failures are not Rising Sun RV's responsibility; we highly suggest you follow all roadway rules, check the tire pressures throughout your journey and ensure you obey posted speed limits to prevent tire failure. Loading, towing, heat and differential pressure can lead to tire blow out; it is the renter's responsibility to monitor these conditions and be knowledgeable with the safe operation of the unit to prevent tire failure.
